U.S. Senate

Week 5, Policy

## The Silent Majority, no longer

This morning as I reviewed my emails, one caught my attention, an invitation from the **Rainbow Center** to attend **Tacoma Pride** on July 14<sup>th</sup>. I was taken back by the Contract they insist on being signed to be introduced at the event. It is becoming clearer to me as to why there is such hatred being unleashed from the Liberal media in recent days. There is no regard for constitutional values, and yet there is a clear agenda to unravel the very fibers of what holds this country together. Liberal Media is fearful they are not being heard, they are losing their voice. Social media is the new media for the voice in the middle, the voice of the "Silent Majority".

This request was a clear contrast to the request early in the election process from **SEAMEC**. Here the **SEAMEC** representatives appeared to want to understand the core underpinnings of my character and to provide insights on the challenges of the LBGQT+ community, so that good policy can be influenced. Here I believed we had an open and inviting dialogue. Members of the interview team were interested in learning what can be done to ensure that the needs of their membership are being met. The dialogue went both directions. I believe we began a conversation.

So how does this relate to a Silent Majority. First, I believe that the traditional media has for too long been influenced by the Liberal Minority, leaving people to believe that the only charitable thing to do is ensure that Government is the solution. This is evidenced as you consider the hatred that is spewing forth from the Media with the current resignation of Justice Kennedy. The left is blind to the advances of science that would encourage a review of current laws so that our judicial process can be improved. Simply, good laws do evolve as science identifies truths.

Now the question, how long does the silent majority stay silent. #MeToo says we stay silent no longer. I agree.

Wake up and realize that we can do something good. The beauty of our Constitutional framework is that each vote counts unless we want to have an excuse and allow for the Minority to intimidate each of us into submission. I thought that this is what the #MeToo movement is all about. Allowing for people **to be** empowered.

If Eastern Washington can have a dramatic impact on a State election, then it tells me that the numbers exist for all Rural areas of Washington State to influence an outcome. Combine this group with that of the Conservatives/Independents in the greater King County Area, we can band together to make a difference.

Working together we can strengthen the economy for all **Families**, ensure the **Freedoms** of all are represented and build **Faith** in a more prosperous future.

We can remove the **Tent Cities** and show Charity,

We can make housing affordable without seeing **Seattle** turned into the next **Detroit**,

We can **reduce the congestion** on our Freeways if we work together.

*Let us believe that the "best is yet to be"*

Vote **Matt Hawkins** for **US SENATE**
